

ARTISTIC LICENSE AGREEMENT

The materialization process comes with the understanding that the information provided is there for inspiration and interpretation only.

The final product is not merely a reproduction or print of a digital image (which user or AI generates). The digital information is the genesis of a collaboration, where **full artistic license** is granted to the artist decoding with physical materials.

Therefore, any purchasing party agrees that the result of their materialization has **no pre-determined outcome*. All outcomes will be an extension of the potential energy initially set in motion within the parameters of the PAINTbending application.
